

Meeting minutes, Wednesday 02/03/2021, 6:45PM

Executive summary

Team observed other teams' presentations and provided feedback. Connor is preparing website for website check 1. Teammates are deciding on self-learning assignment and are beginning to work on it. Preparing for client meeting tomorrow by setting questions to be discussed for clarification.

Announcements

Client meeting tomorrow

Website check 1 soon

Individual progress

Beginning work for Website check 1

CAD on potential assembly to analyze center of mass and rotation.

Future direction, work to complete.

Work on website

Work on self-learning

Look into seeing previous teams design on Friday.

Client meeting tomorrow.

- NDA
- "Project description"
 - Requirement 3 (utilizing hanging weights)
 - Requirement 5 (clarification) center of mass/gravity in two location?
 - Center of mass of CubeSat different than the center of mass of entire assembly
 - 12U is taller requiring larger bearing.
- Spherical Air bearing, given to us? When? If not being supplied what can we use as substitute
- Gantt Chart
- Chart to explain problem statement (ideal solution)

New tasks

Self-learning

Website check 1
